

Gently to the desired Bikini figure

Skin physician Roland Weisser offers a new procedure for the breakdown of fat cells

Spring is in the air, the good resolutions are not yet faded- now it goes to lose weight. But who doesn't know that?

Exactly the places, which particularly disturb in the bikini, turn out as exceptionally diet resistant. And then there are nevertheless still the light beginnings of Cellulite...

The in Freiburg (Germany) established dermatologist **Roland Weisser**, (practice community at the Aschoffplatz), offers a completely new procedure, in order to have the pads under control: By means of ultrasonic the fat cells are destroyed and diminished then from the body. The advantages are obvious: The treatment is accomplished ambulatory - for example in lunch time - leads thus not to down-times or even hospital stays.

The procedure doesn't strain the body, is pain-free, leaves no scars or other traces. A typical application requires five to six meetings, which take approximately in each case one hour.

Mrs. B., which visited **Roland Weisser's** treatment, reports: "I am really inspired by the **ProSlimelt** method: One lies relaxed on a couch and does only feel a not unpleasant tingling. At the end of my lunch time I can see and feel, like the pads became smaller."
